

# Computing

**We don't say "It doesn't work"  
We say "How can I make it work?"**

## **Computing Statement of Intent**

Technology is changing the lives of everyone. Through teaching computing we equip our children to participate in a rapidly changing world where work and leisure activities are increasingly transformed by technology.

It is our intention to focus on developing the skills necessary for children to be able to use information in an effective and creative way.

Computing skills are a major factor in enabling children to be confident, creative and independent learners and it is our intention that children have every opportunity available to allow them to achieve this.
